PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience across Healthcare and Telecommunications domains. IBM Full Stack Software Developer Certified with hands-on experience in Django, React, Node.js, MongoDB, Docker and Kubernetes. Strong Mainframe foundation combined with AI-assisted development and enterprise application delivery.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js

Backend: Python, Django, Node.js, Express.js

Databases: MongoDB, SQLite, DB2, IMS DB

DevOps: Docker, Kubernetes, Git, CI/CD

AI: GitHub Copilot, Generative AI

Mainframe: COBOL, JCL, VSAM, Assembler

PROFESSIONAL EXPERIENCE

Amdocs | Software Developer | Jan 2025 – Present

- Develop and enhance Service Order Communication System (SOCS) applications supporting AT&T telecommunications operations.
- Independently designed and delivered the POTS Suspension Project, introducing manual order creation capabilities within SOCS.
- Developed DB2 subroutines, COBOL IMS modules and JCL components from scratch.
- Integrated DB2 and Assembler routines to support end-to-end order processing.
- Successfully deployed the solution to production in March 2026.
- Utilize GitHub Copilot for legacy COBOL analysis, impact assessment, debugging and development productivity.
- Contributed to SOCS Hardening initiatives and resolved critical production issues.
- Recognized through client appreciations, team recognitions and organizational awards.

IBM India Pvt Ltd | Application Developer | Sep 2023 – Jul 2024

- Developed and enhanced Inquiry Tracking (IQT), an IMS-based healthcare claims finalization application.
- Designed and implemented Claim Reinstatement BPM functionality from scratch.
- Developed COBOL, JCL, DB2 and IMS DB components for healthcare workflows.

- Worked on Auto Letter projects and batch processing support.
- Collaborated with business teams through design, testing, deployment and production support.

Carelon Global Solutions | Software Engineer | Jul 2021 – Aug 2023

- Enhanced Inquiry Tracking applications for Elevance Health.
- Worked on Auto Letter and Batch Letter projects.
- Participated in DLI-to-BMP conversion initiatives.
- Automated report extraction from Power BI and Excel dashboards using Python.
- Supported production releases and defect resolution.

KEY ACHIEVEMENTS

- Delivered POTS Suspension Project as an Individual Contributor and successfully deployed to production.
- Recognized during Townhall for contribution to SOCS Hardening Project.
- Received Spot Award from Amdocs management for exceptional contribution.
- Received multiple client and peer appreciation emails for project delivery.
- Shining Star Award – Claims IT Stellar Awards.
- Outstanding Contribution Award – Inspire High Performance Culture.

FEATURED PROJECT

- Built a full-stack Car Dealership Website using Django, React, Node.js, MongoDB, Docker and Kubernetes.
- Implemented user authentication, dealership management and review workflows.
- Developed REST APIs and Node.js microservices.
- Integrated sentiment analysis services and MongoDB databases.
- Containerized services with Docker and deployed on Kubernetes.
- Implemented CI/CD and automated testing pipelines.

EDUCATION

Bachelor of Technology (Electronics & Communication Engineering) | JNTUK | CGPA: 8.48

CERTIFICATIONS & TRAINING

- IBM Full Stack Software Developer Professional Certificate
- IBM z/OS IDE Basics for Mainframe Development
- NxtWave MERN Stack Program (In Progress)
